

Inglewood Pacific (CA) Chapter of The Links, Inc.

The Arts Facet Program, 2015 - 2017

Vision, Mission and Program

Vision

The Arts Facet of The Inglewood Pacific Chapter of The Links Inc. is built upon the belief that involvement in the visual and performing arts is essential to individual fulfillment and the enrichment of community life. We envision a community where the lives and creations of underrepresented youth of color are celebrated in concert halls, museums, galleries, theatres, and arts education facilities, and in the work of performing arts companies. Most significantly, noting that the visual and performing arts are a way for our youth to find their hidden talents, we seek to inspire tomorrow's creative thinkers.

Mission

It is our mission to enrich and strengthen the lives of the citizens of our service area and surrounding communities through quality visual and performing arts education, performance and outreach. The Arts Facet of The Inglewood Pacific Chapter of The Links Inc. is committed to the celebration of cultural diversity and excellence through the increase of opportunities for diverse students and audiences to participate in and understand the visual and performing arts. We accomplish this in partnership with performing arts institutions, educators and schools, parents, and community and business organizations.

Program

For the last four years, the Inglewood Pacific (CA) Chapter of The Links, Inc. has partnered with the AVID Program of Inglewood High School. We have worked with 12 students to provide an introduction to the world of photography/photo journalism under the direction of renowned photographer, Haywood Galbreath. Our Master teacher provided the students with a variety of experiences with hands-on techniques using professional cameras. Students were also able to capture scenic Los Angeles during the field trip component of this program.
